Computing Fibonacci Numbers with and without Dynamic Programming

Generated by Doxygen 1.9.0

## Chapter 1

## File Index

### 1.1 File List

Here is a list of all documented files with brief descriptions:
fibonacci.c . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ??

## Chapter 2

## File Documentation

## 2.1 fibonacci.c File Reference

```
#include <stdio.h>
#include <time.h>
```

## Functions

- int fibSeq1 (int n)
- int fibSeq2Helper (int n, int fibArr[ ])
- int fibSeq2 (int n)
- int main ()

### 2.1.1 Detailed Description

## Remarks

computation and timing of elements of the Fibonnaci sequence $*$ using the basic recurisve formula for the sequence $*$ with and without dynamic prog.

### 2.1.2 Function Documentation

### 2.1.2.1 fibSeq1()

int fibSeq1 (
mpute the int $n$

## Parameters

```
n}\mathrm{ the nth Fibonacci number to be computed * (starting the sequence at index 0)*
```

## Precondition

$$
0<=\mathrm{n} *
$$

## Returns

the nth Fibonacci number *

### 2.1.2.2 fibSeq2()

int fibSeq2 (
compute the nth fibonacci number, * using the recursive definition and dynamic programming *

## Parameters

```
n the nth Fibonacci number to be computed *(starting the sequence at index 0) *
```

## Precondition

$$
0<=\mathrm{n} *
$$

Returns
the nth Fibonacci number *

### 2.1.2.3 fibSeq2Helper()

int fibSeq2Helper (
int $n$,
int fibArr []
helper function to compute the nth fibonacci number, $*$ using the recursive definition and dynamic programming $*$

Parameters

| $n$ | the nth Fibonacci number to be computed $*$ (starting the sequence at index 0$) *$ |
| :--- | :--- |
| fibArr | an initialize array, recording $*$ Fibonacci numbers already computed $*$ |

## Precondition

$$
0<=\mathrm{n}<=1+\text { length of fibArr array } *
$$

## Returns

the nth Fibonacci number *

### 2.1.2.4 main()

int main ( ) main procedure controls computation, timing, and printing *
